Exploratory Testing Foundations

Maaret Pyhäjärvi

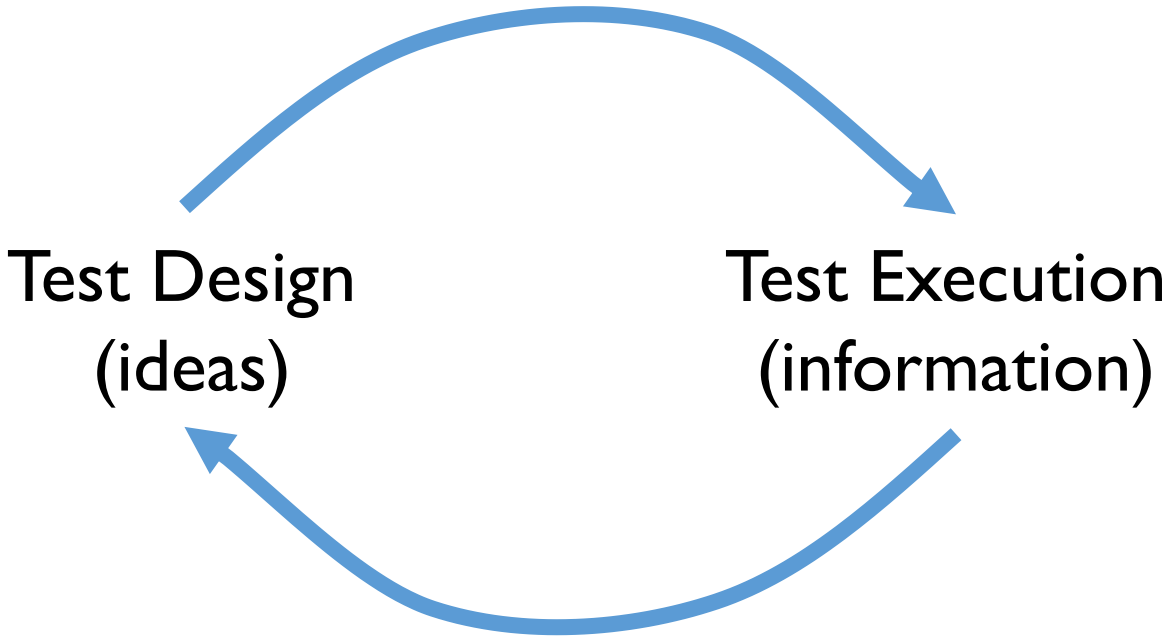
v. 2.0 (2022-02-27)

@maaretp

Optimizing the value of testing

@maaretp

Learning



Exploratory Testing the Verb

@maaretp

Input

Tester

Domain knowledge

Requirements and specifications

Testing knowledge

Miscellaneous knowledge

Output

Better tester

Coverage

Information incl. defects and change requests

Documentation: Strategy

Documentation: Tests

Course Outline

Chapter 1: Test target and our options for exploring
Chapter 2: Self-management basics on setting yourself constraints
Chapter 3: The moment of first impression
Chapter 4: Recognizing and learning a domain
Chapter 5: Recognizing functionality
Chapter 6: Recognizing data
Chapter 7: Recognizing application and execution environment
Chapter 8: Documenting in a mindmap
Chapter 9: Robot framework the very basics
Chapter 10: Documenting as skeleton test automation
Chapter 11: Robot framework browser library and CSS selectors on web pages
Chapter 12: Documenting as executable test automation
Chapter 13: Why this is not about Robot Framework
Chapter 14: Use of time
Chapter 15: Coverage
Chapter 16: Test Strategy
Chapter 17: Closing remarks

Course Outline

Section I: Options for Exploring 1 3

Section II: Control through Choices 2

Section III: Documenting (with Automation)

4-13 Extending with Function, Data, Environment and Domain

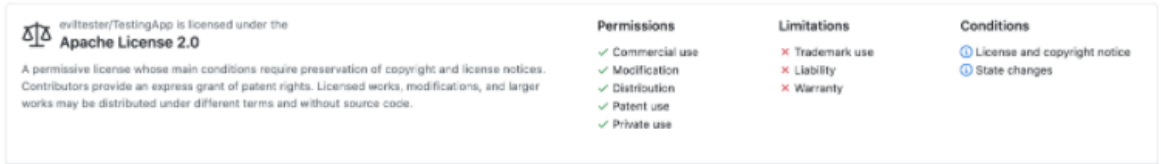
Section IV: Use of time and coverage 14-17

Test Target and Our Options for Exploring

Chapter 1

@maaretp

exploratorytestingacademy.com/app/



This test target is from collections of Alan Richardson, eviltester, a brilliant exploratory tester.

E-Primer an e-prime checking tool

Do you want to write without using the verb "to be"?

Do you want to master e-prime?

Use our online tool to check your writing.

- Word Count:
- Discouraged Words:
- Possible Violations:

Text:

Check For E-Prime

@maaretp

Stop-and-Think: Options for Exploring

What would you do first, and soon after you get started?

List all things that come to your mind about how you could test this. What would you start from? What you would not do?

Options for Exploring

Research the Domain

Use test target *with a constraint*

@maaretp

Self-management Basics on Setting Yourself Constraints

Chapter 2

@maaretp

Charters

Charter template

- *target*: where you're exploring
- *resources*: what you're using/how you're exploring
- *information*: what question you want to answer

Elizabeth Zagroba's concise template adapted from Elizabeth Hendrickson's template

@maaretp

Choose Your Own Constraint

Deliberately excluding perspectives!
Never Be Bored!

@maaretp

Explore with Intent

Stop-and-Think: Charters, Constraints, Intent

You're approaching the moment of first impression. How do you want to frame your moment of first impression?

The Moment of First Impression

Chapter 3

Options Expire

Capture First Impression

Borrow someone else's First Impression

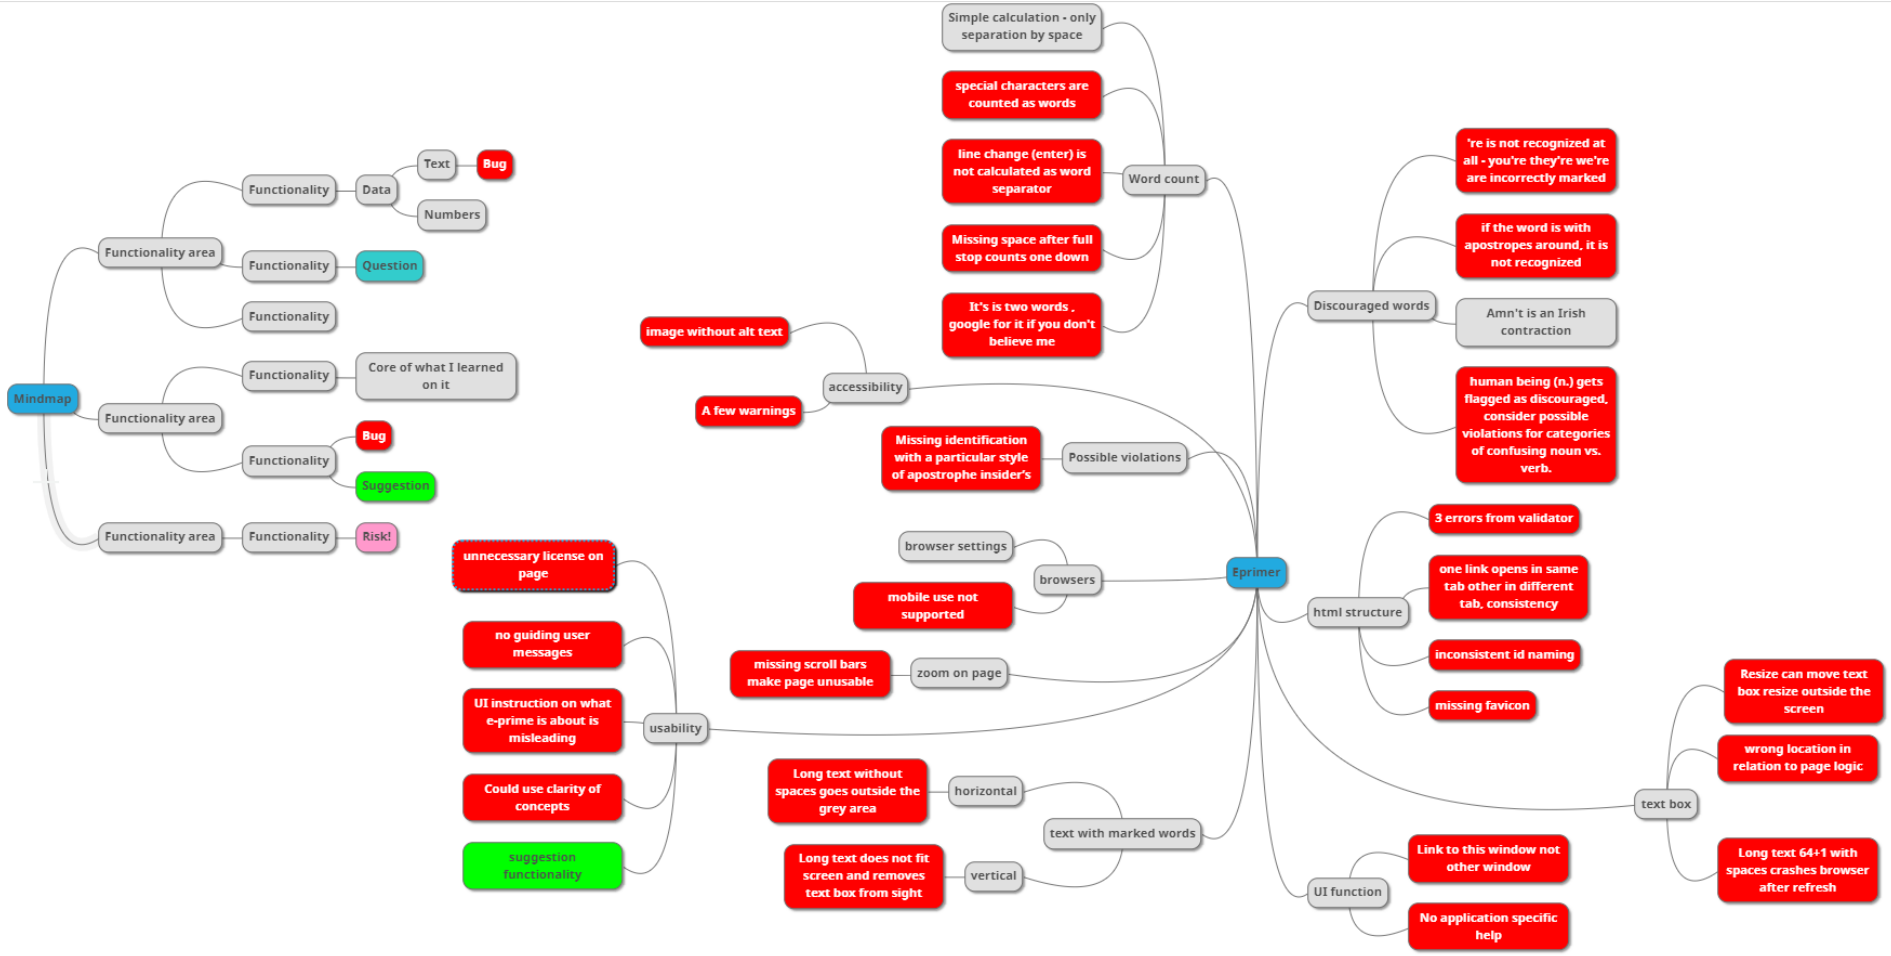
Timing of feedback changes reaction to it!

@maaretp

Let's Test

https://www.exploratorytestingacademy.com/app/
https://eviltester.github.io/TestingApp/apps/eprimer/eprimer.html

Example: Test Results, Red is Bug



@maaretp

Bugs are Conversation Starters

Bug is anything that might bug a user.
You start conversations about defects and change requests.

@maaretp

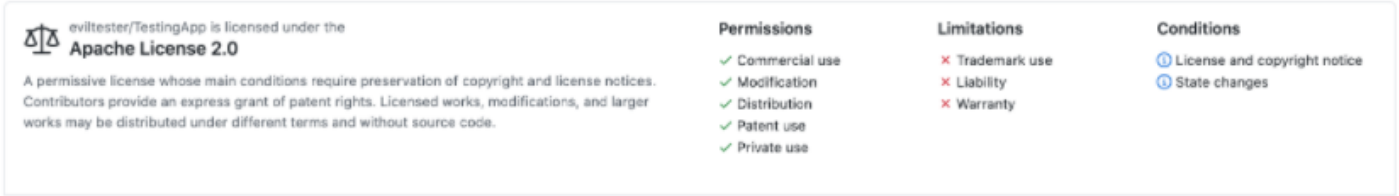
Recognizing and Learning a Domain

Chapter 4

@maaretp

Conference
Reference
Inference

@maaretp



This test target is from collections of Alan Richardson, eviltester, a brilliant exploratory tester.

E-Primer an e-prime checking tool

Do you want to write without using the verb "to be"?

Do you want to master e-prime?

Use our online tool to check your writing.

- Word Count: 9
- Discouraged Words: 3
- Possible Violations: 1

To be or not to be is Hamlet's dilemma

Text:

To be or not to be is Hamlet's dilemma

Check For E-Prime

@maaretp

exploratorytestingacademy.com/app/eprime.js

```
function inEPrimeOutputFormat(aWord){
    return '<span class="ep_violation">' + aWord + "</span>";
}

function inPossibleEPrimeOutputFormat(aWord){
    return '<span class="ep_warning">' + aWord + "</span>";
}

function isDiscouragedWord(aWord){

    var discouragedWords = new Array();
    discouragedWords['be'] = 'be';
    discouragedWords['being'] = 'being';
    discouragedWords['been'] = 'been';
    discouragedWords['am'] = 'am';
    discouragedWords["isn't"] = "isn't";
    discouragedWords["are"] = "are";
    discouragedWords["aren't"] = "aren't";
    discouragedWords["was"] = "was";
    discouragedWords["wasn't"] = "wasn't";
    discouragedWords["were"] = "were";
    discouragedWords["weren't"] = "weren't";
    discouragedWords["is"] = "is";
    discouragedWords["ain't"] = "ain't";
    discouragedWords["i'm"] = "i'm";
    discouragedWords["amn't"] = "amn't";

            return (discouragedWords[aWord.toLowerCase()]==aWord.toLowerCase());

}
```

@maaretp

Let's Test

https://www.exploratorytestingacademy.com/app/
https://eviltester.github.io/TestingApp/apps/eprimer/eprimer.html

Learning of Domain of E-Primer

Core Idea	Writing English language avoiding verb "be" in all its forms
Why?	Someone claims it had benefits, intellectual challenge
Examples	Used in sentences Listed examples
Sample texts	The Bible!

Recognizing Functionality

Chapter 5

@maaretp

Naming of Function

Functions in Code
Expected Features
Visible Features

@maaretp

Let's Test

https://www.exploratorytestingacademy.com/app/
https://eviltester.github.io/TestingApp/apps/eprimer/eprimer.html

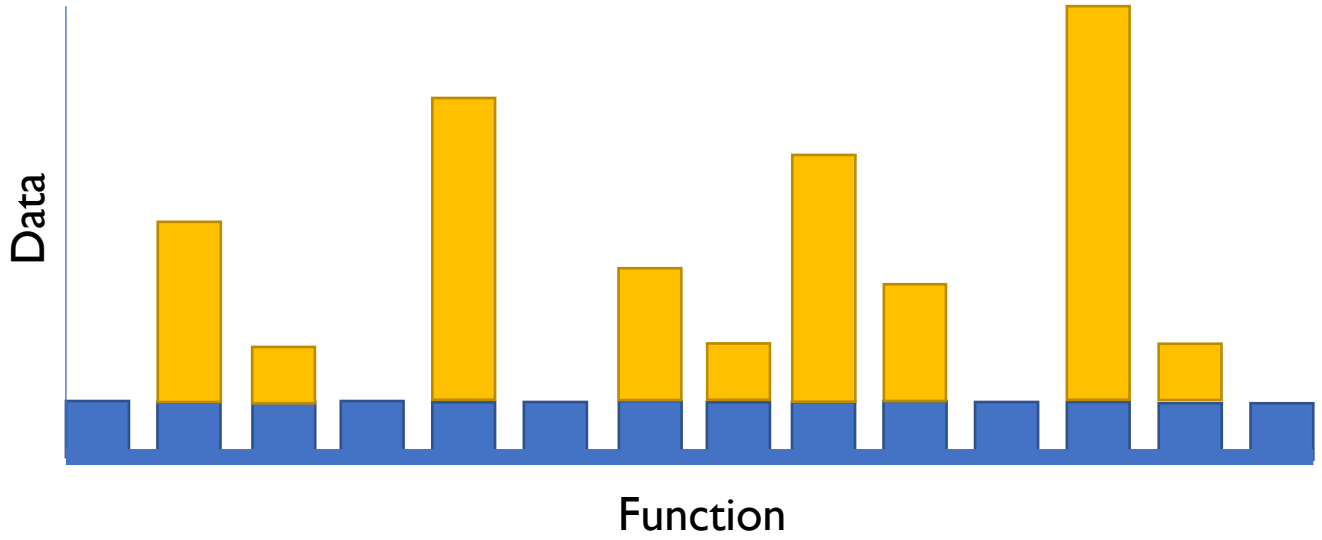
Learning of Function of E-Primer

Input	Text field and button
Output	Three numbers, text area
Containers	Resizable text field, resizable browser window, page
Presentation	Fonts, text and element sizes, order of functions
Browser	Settings, zoom
Algorithm	Recognizing eprime

Recognizing Data

Chapter 6

Data or Variables



Versatile Data

Lifecycle of Data: Create, Read, Update, Delete
Known problematic inputs: GitHub Naughty Strings

https://github.com/minimaxir/big-list-of-naughty-strings/blob/master/blns.txt

@maaretp

Let's Test

https://www.exploratorytestingacademy.com/app/
https://eviltester.github.io/TestingApp/apps/eprimer/eprimer.html

Learning of Data of E-Primer

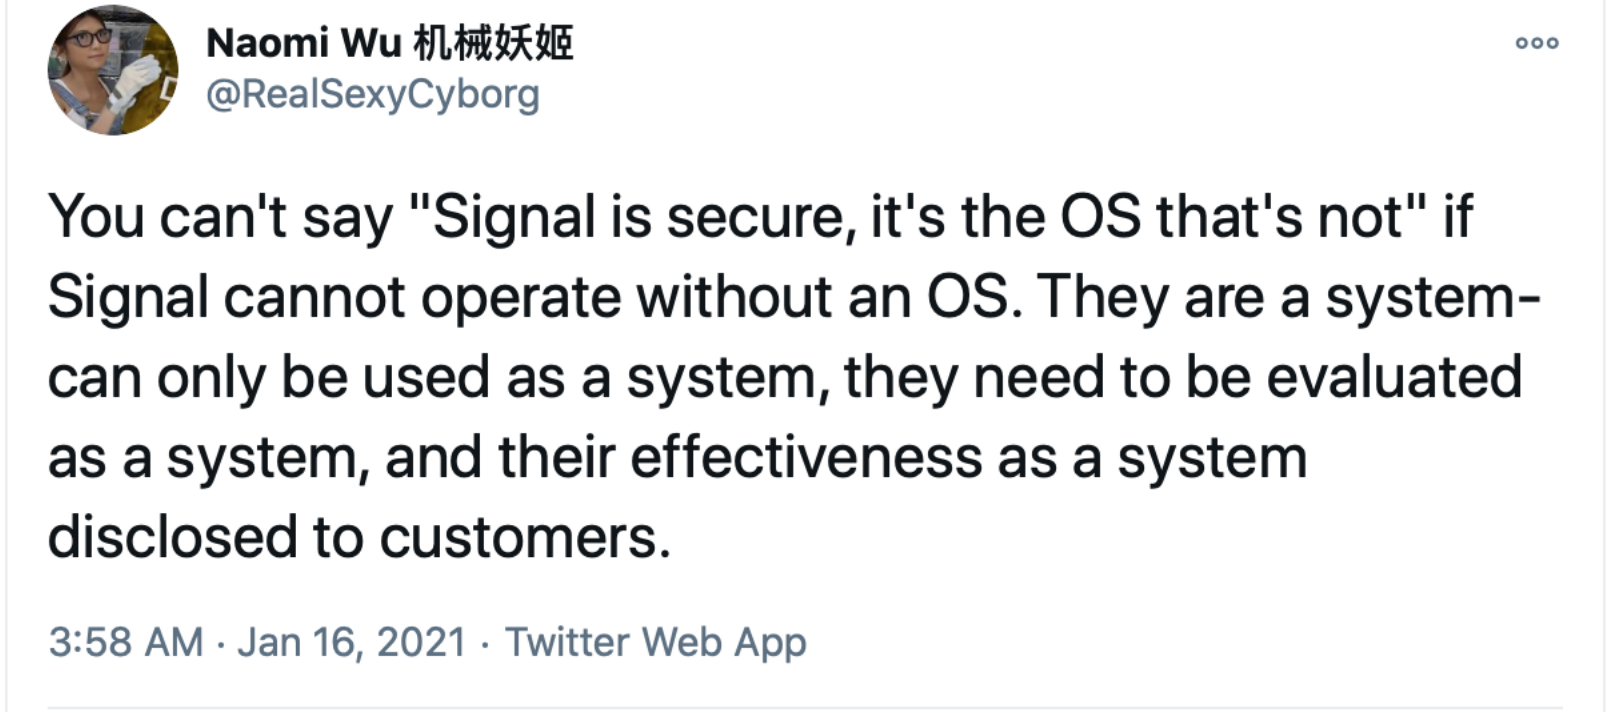
Word delimiter	Space, wordcount breaks with characters and line change
Types of apostrophes	Typesetter / typewriter
Long text	Copied / tool generated
Valid eprime	Recognizing right as right
Eprime violations	Recognizing wrong as wrong

Recognizing Application and Execution Environment

Chapter 7

@maaretp

What You Coded is a Bad Constraint



@maaretp

Execution Environment

Different browsers: web and mobile
Browser functionality and add-ons
HTML standard compatibility
Accessibility standard compatibility

Let's Test

https://www.exploratorytestingacademy.com/app/
https://eviltester.github.io/TestingApp/apps/eprimer/eprimer.html

Learning of Application and Execution Environment of E-Primer

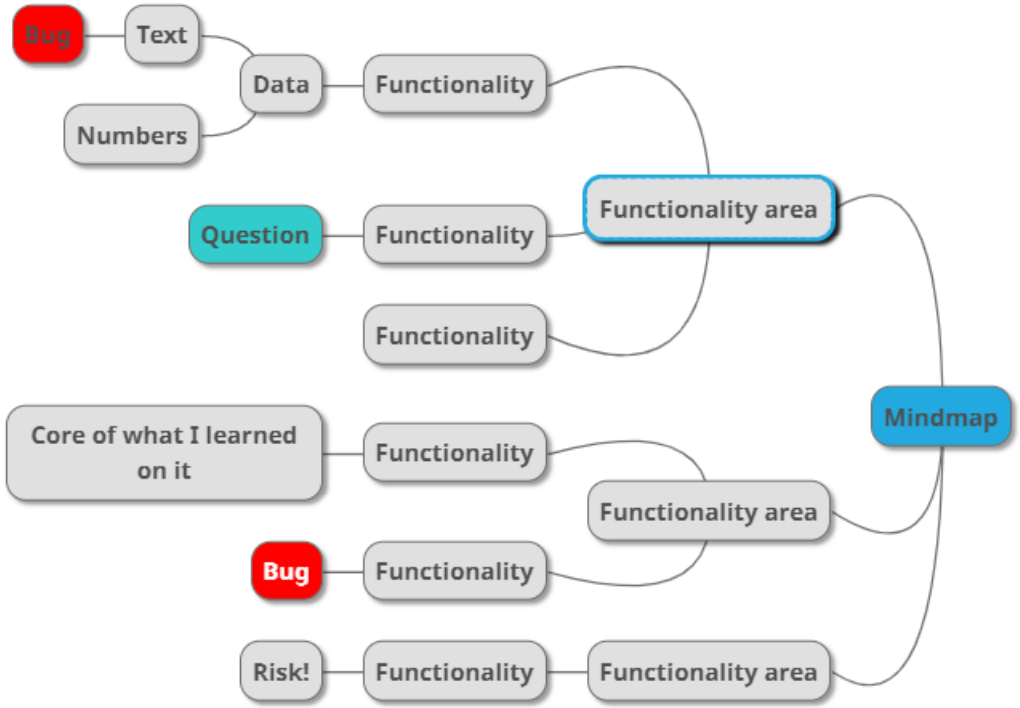
Browser	Chrome, Brave, …
Screen size	Web, Mobile
Browser Settings	Zoom, Security, …
Add-ons	BugMagnet
Validators	HTML, Accessibility, …

Documenting in a Mindmap

Chapter 8

@maaretp

Mindmap



@maaretp

Cem Kaner. Bug Reporting Heuristic.

Bug Reports

R eplicate

I solate

M azimize

G eneralize

Documenting as Executable Test Automation

Throwaway automation?

Single line
→See it fail
→First test
→Same test but variables
→Same test but templates
→Failing test with a bug
→Spec to tests
→Guess the values that are likely to fail
→Multiple browsers
→Runs in CI

Why This is not about Robot Framework

Chapter 13

@maaretp

Documentation as a Constraint

A Balancing Act between Now and Future
Never be bored is not possible without automation

@maaretp

Automation in Frame of Exploratory Testing

 Documenting

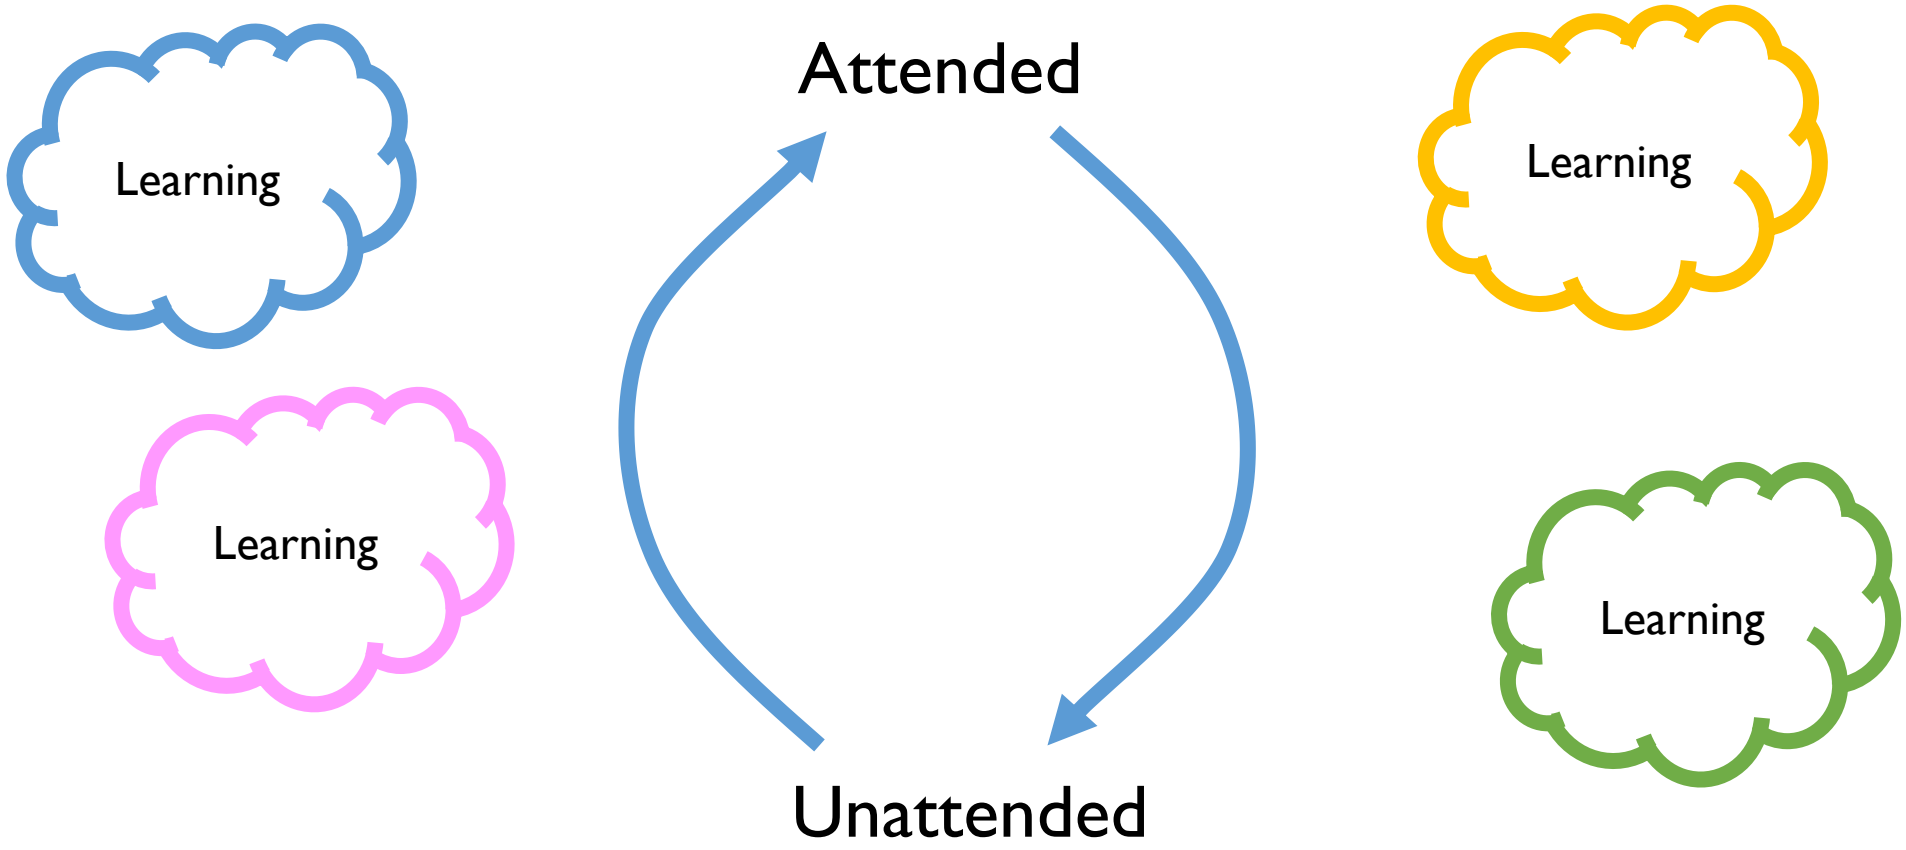
 Extending reach

 Alerting to attend

 Guiding to detail

@maaretp

Moving Focus



@maaretp

Stop-and-Think:
Robot Framework Browser

How would the testing you did before this have been different if you were to start with this?

Use of Time

Chapter 14

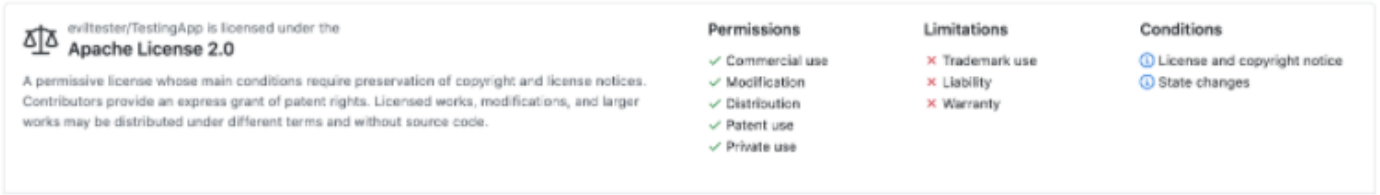
Test, Bug, Setup

Software with little bugs is faster to test

Setup is configuring, learning and documenting

Test grows coverage

@maaretp



This test target is from collections of Alan Richardson, eviltester, a brilliant exploratory tester.

E-Primer an e-prime checking tool

Do you want to write without using the verb "to be"?

Do you want to master e-prime?

Use our online tool to check your writing.

- Word Count: 9
- Discouraged Words: 2
- Possible Violations: 1

to be or not to be - hamlet's dilemma

Text:

to be or not to be - hamlet's dilemma

Check For E-Prime

Test Cases trap

Bug trap

Data trap

Algorithm trap

@maaretp

Stop-and-Think: Time and Traps

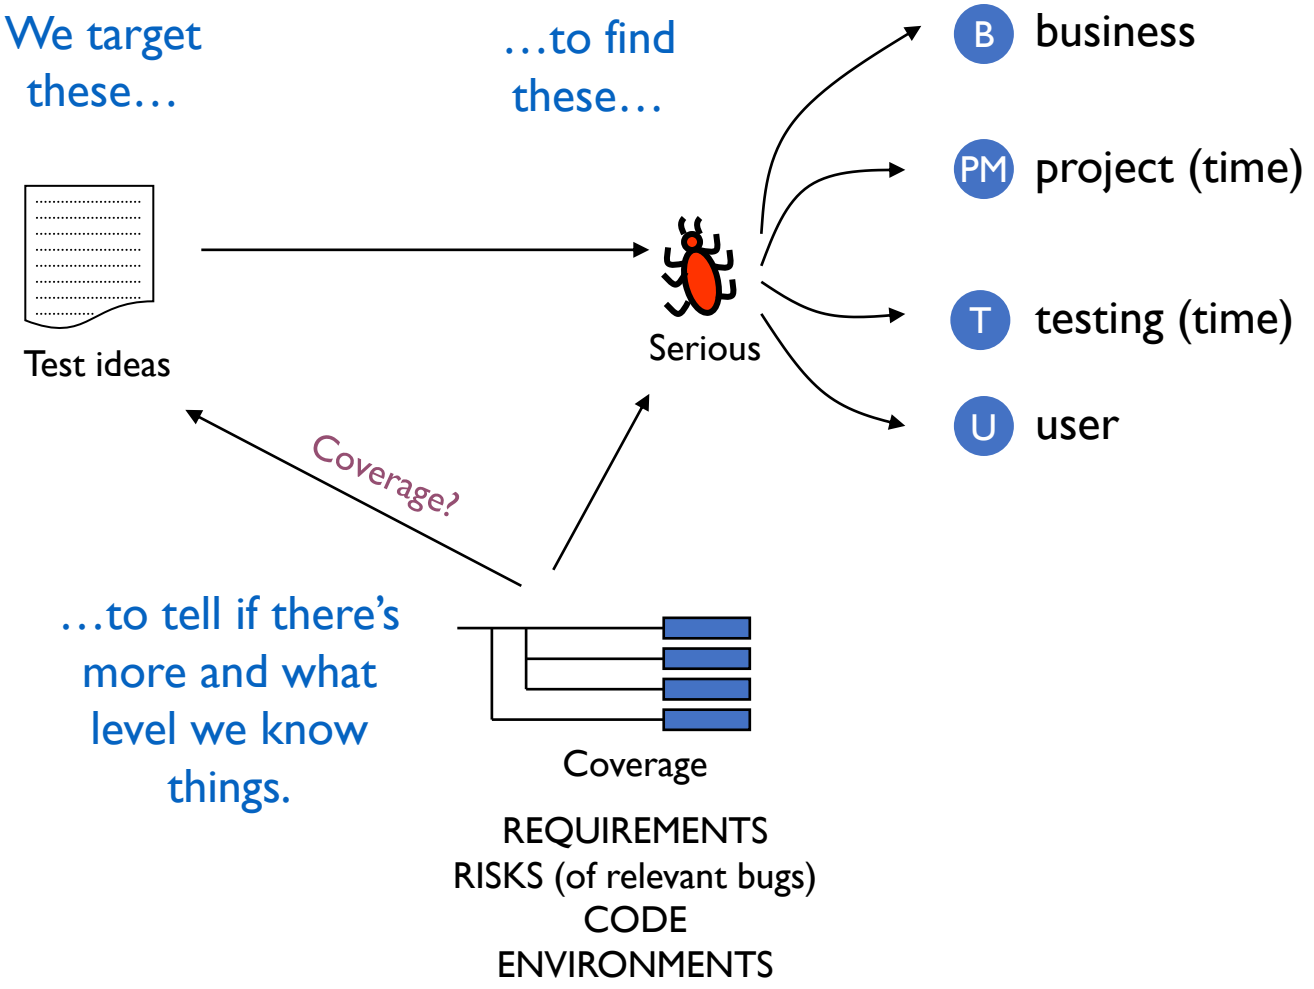
Where did your time go on testing of the application?

Coverage

Chapter 15

Setting the Stage for Testing

WHAT
WHEN
WHO
HOW
WHY



@maaretp

Risk Coverage

Coverage of relevant bugs
Effectiveness – results of overall strategy
facilitate experience of quality for stakeholders

@maaretp

Stop-and-Think: Coverage of Today's Testing

Would the testing you thought of have missed any of the bugs we have seen?

What did we not test?

Test Strategy

Chapter 16

@maaretp

Ideas that Guide Test Design

Specific to Application Under Test
Risks to ways of testing for them

@maaretp

Let's Test

https://www.exploratorytestingacademy.com/app/
https://eviltester.github.io/TestingApp/apps/eprimer/eprimer.html

Test Strategy for E-Primer

What is the product?

- E-Primer is an English text validator that checks text against specific rules around avoiding the verb 'to be'. It identifies rule breaking in two categories: one that can be checked by a rule, and another that needs human assessment (for now).

What are the key potential risks?

- It suggest the wrong corrections and misses corrections in realistic text samples
- It miscounts words in a way that leads us to underappreciate the scale of processing.
- It looks wrong on some browsers and data samples
- It requires too much effort to learn in relation to the value of proofreading it provides

How could we test the product so as to evaluate the *actual* risks associated with it?

- Understand the rules of e-prime through research
- Collect data samples (short and long ones) that represent both e-prime text and text that violates rules of e-prime and run them through the program.
- Verify common forms of 'to be' are systematically recognized across the samples
- Document specification as automation that shows the rules of e-prime and enables running subset of all tests across browsers.
- Try fooling word count to count less words or more words by specific data samples
- Run the web page through a set of html-validators
- Visually verify the page with realistic e-prime text samples
- Read the code of the application for inspiration focusing on names of functions rather than understanding implementation
- Summarize learning obstacles for user and value of the application as comparison sheet

@maaretp
